

# I N Y Z I A

Inyzia is the collaboration of 3 artists : Lorenzo Favero, Pascal Simon and David Stultiens.

David Stultiens and Pascal Simon, Belgian producers and composers, embarked on their sonic exploration in the studio many years ago. Their meeting on musical exchange platforms was the prelude to the creation of a joint project, "Inyzia" materialized in 2022. This project represents a new musical chapter, reflecting a universe that satisfies both their demands in terms of sound and musicality.

In 2023, Lorenzo Favero discovered "Inyzia" and was immediately captivated by the quality of the published compositions. With over 20 years of experience as a DJ and studio producer, Lorenzo contacted David, he already knew, and offered his expertise to refine the tracks and make them even more suited to the enchanting atmosphere of clubs. The trio was quickly formed, merging the dynamic and deep sounds of the initial duo with Lorenzo's emotional sensitivity.

They describe their music as enchanting and full of suspense.

Their greatest motivation lies in the desire to share the emotions evoked by their creations and to experience the live audience's reaction. The aspiration to create a connection with their audience during live performances is the essential driving force behind their artistic approach.
